BD 50

3221 : 12x500ml (aerosol)

1303 : 3x5L

USE

Bardahl BD 50 is a multifunctional lubricant developed for professional and household uses. It contains ester oil and extreme pressure additives. BD 50 has therefore a good resistance to high temperatures and extreme pressure.

PROPERTIES

1- Penetrates:

Due to its high capillary action, the BD 50 penetrates to the heart of the mechanisms and releases the parts blocked by rust (nuts, hinges, axes, ...).

2- Lubricates:

The BD 50 contains an active, permanent lubricant, forming a thin, colorless film that eliminates squeaks and reduces friction and wear.

3- Protects:

The film formed provides protection against moisture and thus against oxidation and corrosion.

4- Repels moisture:

Due to its affinity for metal and its low surface tension, BD 50 repels water and condensation and prevents moisture from seeping in by covering the surface with a light oily film. It repels moisture from electrical or electronic systems and restores electrical contacts.

5- Cleans:

The BD 50 cleans the residues (oils, greases, tar ...) without leaving any deposits of aggressive agents. It can be used on all metals and plastics.

INSTRUCTIONS FOR USE

Shake well the aerosol before use.

PHYSICAL & CHEMICAL PROPERTIES

Physical state	Liquid
Colour	Yellow
Flash point	61 °C
Relative density	0,828
Viscosity, kinematic	< 20,5 mm ² /s (40°C)
